

June 27 marks **National HIV Testing Day** (NHTD), a timely opportunity to promote compassion, respect, and proactive self-care. HIV testing is a critical step in empowering individuals to take charge of their health. It is also the entry point to effective prevention strategies, timely treatment, and long-term well-being.

We invite you to join and amplify the national effort by supporting local testing initiatives and sharing available resources with your communities.

🩺 Free, rapid HIV testing will be offered at participating Walgreens locations nationwide in partnership with Greater Than HIV. Trained staff will provide on-site support, including information about PrEP, HIV prevention, and treatment options.

📍 Walgreens Locations
🗓️ June 27th | Hours vary by site
🔗 Find a testing site nearby: greaterthan.org

In Connecticut, providers and community partners can also access regional testing and care resources.
