

## **World AIDS Day: Collective Action to Sustain and Accelerate HIV Progress!**

As World AIDS Day 2024 approaches, we invite you to stand with us in honoring this year's theme, "Collective Action: Sustain and Accelerate HIV Progress." This day serves as a powerful reminder of the progress we've made in combating HIV/AIDS and the work that still needs to be done.

The Integrating HIV Innovative Practices (IHIP) project has played a pivotal role in advancing efforts to combat HIV/AIDS, supporting the development of implementation tools and resources, offering peer-to-peer technical assistance, and providing comprehensive capacity-building support. These resources have enabled organizations and providers to adopt and implement innovative interventions that bridge gaps in prevention, treatment, and care across the HIV Care Continuum. They also address the social determinants driving HIV among historically marginalized populations disproportionately impacted by the epidemic: people from racial and ethnic minority groups, LGBTQ+ individuals, people with substance use disorders, and justice-involved persons.

This World AIDS Day, we invite you to push forward by requesting our one-on-one technical assistance (TA), designed to support you and help build your skills to create effective intervention resources across the HIV Care Continuum and share vital resources in your community. You can request TA by emailing [ihiphelpdesk@mayatech.com](mailto:ihiphelpdesk@mayatech.com)

Check out our TA videos here spotlighting innovative HIV care interventions:
